# I

#### **PRELIMINARY**

Make preparations before we start.

## Installation 1

So far, there is no built binary for mmCEsim since it is still under development. However, you may clone the GitHub repository and compile it yourself.

```
1 git clone https://github.com/mmcesim/mmcesim.git --recurse-submodules
2 cd mmcesim
3 cmake .
4 make
```
